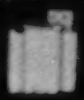
Kansas Farm Facts



1988

Kansas State Board of Agriculture

Kansas Farm Facts

KANSAS AGRICULTURAL STATISTICS INFORMATION FOR 1987

AND PRELIMINARY ESTIMATES FOR 1988

Sam Brownback
Kansas Secretary of Agriculture

INTRODUCTION

The Kansas State Board of Agriculture's statistics division, widely known as Kansas Agricultural Statistics, is jointly funded by the state and USDA's National Agricultural Statistics Service. The program of statistical reports ranges from weekly Crop-Weather Reports during the March-November growing season to monthly, quarterly, and annual data series, many of which are summarized herein.

This publication provides a continuing series of data of critical importance in measuring the success and progress of Kansas agriculture. The current facts and trends shown in this publication are essential to our farmers as they make their production and marketing decisions. They are also of utmost importance to agribusiness firms as they work with farmers to improve the overall efficiency of agriculture by better planning to meet the needs of production agriculture in deliv-ering input supplies and in providing viable markets. Reliable data such as that shown on the pages herein are essential to the economic efficiency of the agribusiness segment which is of critical importance to the Kansas economy.

I want to convey my personal thanks to the thousands of Kansas farmers and agribusiness firms who have responded to the many surveys conducted by Kansas Agricultural Statistics. Your response to those surveys is the foundation upon which our data system is based and in responding you have made an important contribution to the Kansas economy.

Sam Brownback
Kansas Secretary of Agriculture

KANSAS AGRICULTURAL STATISTICS PROCEDURES AND STAFF

Information is collected in many ways: mail surveys, telephone contacts, personal interviews, and in-the-field observations.

Most estimates are based on probability sample surveys. That is, what is happening with the total group is accurately inferred from contacts with a scientifically selected portion of the total. Or stated another way—information from only a part of the total group is used to estimate the activities of the entire group. Sampling is not only less costly in time and money than a complete count, but can be more accurate because reporting errors and data-handling errors are minimal compared to those in a complete count or census.

Program content is planned to provide a comparable series of data over time—for example, Kansas wheat and corn production estimates date back to 1866—but also to meet current needs to the extent permitted by available resources. This issue of Farm Facts provides the first official estimates of sunflowers and catfish production in Kansas. Data user meetings and close contact with farm and industry groups are utilized to maintain the relevance of the data provided.

Kansas Agricultural Statistics staff includes highly trained agricultural statisticians with farm backgrounds and extensive experience in Kansas and other states, a support staff of statistical assistants, computer personnel, and printing-mailing specialists. Eldon J. Thiessen is the Deputy State Statistician. Crop Statisticians include Neil Gum, Larry Canion, and Betty Wright. Livestock Statisticians include Charles L. Ruckman, Coen T. Barnes, and Terry E. Mathews. Dewayne E. Hamilton is the Survey Statistician, assisted by Research Analyst Peter Kahn. Ronald A. Sadler, Systems Analyst, and Melvin E. Perott, Programmer, lead computer activities. Candace S. Thomas and Judy Allison provide editorial assistance. In addition, a field and telephone staff of part time enumerators, working under the direction of field supervisors, collect data by personal and telephone interview. The office staff and crew of enumerators join me in thanking farmers and others who provide the data and assist in planning our program of statistics.

M. E. Johnson
State Statistician

1988 AGRICULTURAL HIGHLIGHTS

by Sam Brownback

Drought gripped the nation's midsection throughout the summer of 1988 and dominated Kansas agricultural news. The dry weather had a major impact on fall harvested crops, hay, and pasture throughout the state, but particularly in the northeastern quarter of Kansas. The resulting reductions in crop yields were more than offset by increased prices so that the value of crop production in Kansas during 1988 exceeded the previous year.

Most Kansas farmers came into the year in an improved financial condition with Kansas net farm income at a record level in 1987. Early in the year prices received for grain crops were generally higher than the previous year due to government farm programs which helped to draw down stocks and from mid-year on prices were further enhanced by the reduced yield expectations stemming from the drought. The year brought higher cattle prices, but lower hog prices. Producers of both cattle and hogs gave overwhelming support to check-off referenda which provided optimism for improved demand for beef and pork through aggressive promotion programs.

Precipitation in Kansas through 1988 was widely variable in time, location, and quantity, but mostly dry. In the Northeast Agricultural Statistics District monthly precipitation ranged from a low of ten percent of normal in October to a high of 99 percent in January. The situation was a little better in north central, central, and east central Kansas. Northwest and southeast Kansas had the most favored precipitation records.

At year's end the Long Term Drought Severity Index showed moderate to severe drought conditions in all but the western third of the state and the Southeastern Agricultural Statistics District. Although 1988 crops came through with surprisingly good yields with total production of the four major grain crops down only 16 percent from the previous year, there was serious concern regarding the outlook for 1989 wheat production. With dry conditions the crop went into winter with a relatively poor root system and inadequate top growth to prevent serious winter-kill and wind damage.

Wheat production in Kansas totaled 323 million bushels in 1988. This was 12 percent below 1987 and the lowest production since 1981. A total of 9.5 million acres were harvested. This was down four percent from the previous year and the lowest harvested acreage since 1972. The yield, at 34 bushels per acre, was down three bushels from 1987 and was two bushels shy of the 1984-1988 five-year average yield of 36 bushels per acre.

The 1988 wheat crop was planted on a timely basis, but dry weather persisted through much of December. Leaf rust and wheat streak mosaic were widespread with the crop coming through winter in only fair condition. Spring moisture was generally adequate for growth and development. Wheat streak mosaic was the major factor contributing to yield losses. During the first five months of the year prices farmers received for wheat averaged 20 to 40 cents higher than year ago levels, but that price differential jumped to the $1.00 range in June and remained close to that level throughout the end of the year. The total market value of the 1988 wheat crop approached $1.16 billion, compared with about $890 million the previous year. Quality of the crop was excellent with test weight and protein averaging the highest of recent years.

Corn production totaled 144 million bushels in 1988, two percent above the previous year. With close to two-thirds of the Kansas corn crop irrigated, average yields were five bushels above the previous year, but were about two bushels below the five-year average. Many dry land fields in the extreme northeastern portion of the state were devastated by the hot, dry conditions which persisted through the summer, but a surprising number of corn fields thought to be marginal produced a crop worthy of harvest. With many midwestern states suffering substantial corn crop losses, prices received, which had averaged 20 to 40 cents a bushel above year ago levels during the first five months of the year, were running more than a dollar a bushel above the previous year from July through October and maintained a substantial advantage through the end of the year. The total market value of the crop reached $374 million, some 43 percent more than the 1987 crop.

Grain sorghum production in Kansas was seriously hampered by the drought with total production estimated at 205 million bushels, down 25 percent from last year. The estimated average yield of 62 bushels per acre was down 11 bushels from the previous year and was four bushels below the five-year average. Grain sorghum prices had also responded to export enhancement programs averaging 25 to 60 cents per hundredweight above year ago levels during the first five months of the year, but often exceeding year ago levels by more than $1.50 per hundredweight through the summer months and maintaining a differential of over a dollar at year's end. The total market value of the crop, at close to $452 million, exceeded year ago levels by five percent. Kansas continues to be the nation's leading grain sorghum producer.

Soybeans were also hampered by drought and showed deterioration during each month of the growing season. Total output of the crop was 46 million bushels, down 32 percent from a year ago. Yields averaged 23 bushels per acre, significantly better than many drought years, but still nine bushels below last year and some four bushels below the five-year average yield. Although most of the state remained dry, rainfall in southeast Kansas was some 37 percent above normal in November thus hampering the wrap-up of soybean harvest in some communities. Estimated value of soybean production, at $343 million, was eight percent less than last year. The average prices received for soybeans was well above year ago levels, ranging from about $1.20 per bushel higher in January up to more than $3.25 a bushel higher in August.

The drought caused significant impact on hay production. Hay prices were extremely volatile and during the hot, dry, uncertain summer were as speculative as prices for other crops. The Kansas hay crop was estimated to be down 14 percent, but average prices received for all hay reached as high as $89.00 a ton in December 1988, compared with $61.00 per ton in Decemter 1987. There was a good demand for quality hay.

All cattle and calves on Kansas farms and ranches on January 1, 1989 totaled 5.9 million head, up one percent from the previous year, but showing little change in trend over the past eight years. The cattle feeding industry in Kansas continues to show expansion with fed cattle marketings during 1988 three percent above the previous year's marketings. The monthly average prices received for steers and heifers was about 11 percent above the previous year, and cash receipts from the sale of cattle during 1988 exceeded $3.8 billion. This is a 12 percent increase from the previous year. The slaughter of cattle in Kansas totaled 6.3 million head, just barely over the previous year, but again making Kansas the nation's leader in cattle slaughter.

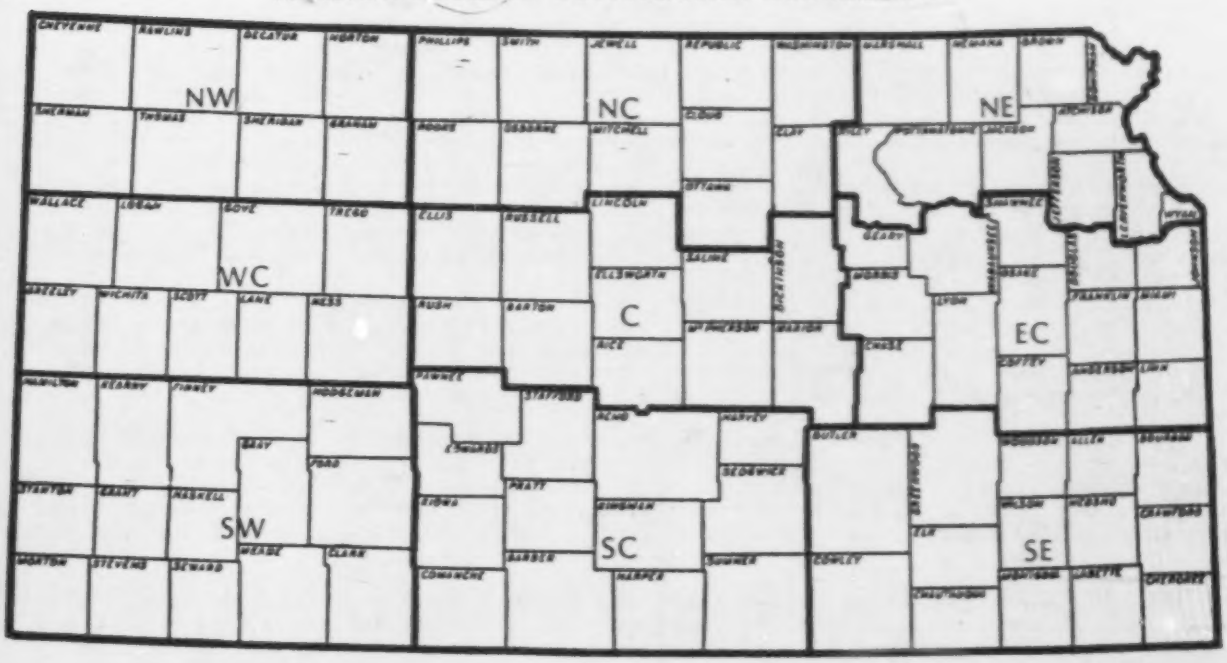
Kansas' quarterly hog inventories showing a response to the national trend of increasing numbers were up six percent at mid-year and at 1.5 million head were up two percent in December. The year's pig crop was about seven percent above the previous year, but hog prices were down substantially, particularly at mid-year. Average prices received by farmers for hogs during 1988 were some $8.50 a hundredweight, or 17 percent, less than the 1987 average. Cash receipts from hogs were down ten percent from year ago levels.

Kansas' sheep inventories on January 1, 1989 totaled 262,000 head, down 5 percent from the previous year's 14-year high mark. The slaughter of sheep in Kansas during 1988 totaled some 435,700 head, about seven percent higher than the previous year and the largest total since 1956 when 511,000 head were slaughtered. Despite the increase in slaughter, sheep and lambs on feed in Kansas, at 98,000 head on January 1, 1989, were down seven percent from a year earlier.

At the beginning of 1988 Kansas agriculture appeared to be on the road to recovery. Farmland values in February of 1988 averaged $368 an acre, up eight percent from the previous year. Total net farm income, spurred by government payments totaling a record level $966 million, reached nearly $1.7 billion in 1987, an all-time record. That net farm income was also the result of a considerable improvement in cash receipts from both crops and livestock. Kansas farmers came into 1988 with total assets 26 percent higher than the previous year and net worth 36 percent higher. Debt to asset ratios had shown considerable improvement declining to .23 as compared with .28 at the beginning of 1987 and .32 a year earlier. Surveys showed a declining proportion of Kansas farmers in financial trouble.

The drought year of 1988 did not treat all farmers equally. Some who were already in financial trouble had to bear an even greater burden while those who were blessed with rain and produced a reasonable crop were able to take advantage of improved prices and had opportunity to enhance their financial condition.

AGRICULTURAL STATISTICS DISTRICTS



Kansas is divided into nine Agricultural Statistics districts for convenience in compiling and presenting statistical information on crops and livestock. These nine districts are outlined on the above map. The districts are designated as follows: northwest (NW), west central (WC), southwest (SW), north central (NC), central (C), south central (SC), northeast (NE), east central (EC), and southeast (SE). In tables showing statistical information by counties in this bulletin, counties within each district are grouped together in alphabetical order. Totals and averages are shown for each district.

NUMBER OF FARMS 1/ AND LAND IN FARMS

Year	Number of Farms	Average Size of Farm	Acres in Farms	Year	Number of Farms	Average Size of Farm	Acres in Farms

1977.....	77	629	48,400	1988.....	69	694	47,900

1/ Beginning with 1975, a farm is defined as any place with annual sales of agriculture products of $1,000 or more. Between 1959 and 1975 a farm was defined as a place of 10 or more acres that had annual sales of agricultural products of $50 or more, or a place of less than 10 acres that had annual sales of $250 or more. Prior to 1959 a farm was defined as a place three acres or more in size with a value of farm products amounting to $150 or more. Places of less than three acres with sales of $250 or more were also considered farms.

KANSAS FARM FACTS

KANSAS' RANK IN U. S. AGRICULTURE, 1988

Crop or Livestock Item	Production or Number	Rank	Kansas Number as % of U.S. Total
All Wheat Produced	323,000,000 bu.	1	17.8
Sorghum Grain Produced	204,600,000 bu.	1	35.4
Sorghum Silage Produced	1,400,000 tons	1	25.7
Wheat Flour Milled 4/	46,363,000 cwt.	1	13.7
Cattle Slaughtered	6,306,600 head	1	18.0
Cropland 2/	30,598,859 acres	2	6.9
Grain Drills on Farms 3/	64,445 number	2	6.4
All Cattle and Calves on Farms, Jan. 1, 1989	5,900,000 head	2	5.9
Prime Farmland 1/	25,602,400 acres	2	7.5
Red Meat Production by Com'l. Slaughter Plants	4,776,076,000 lbs.	3	12.0
Wheat Flour Milling Capacity, Nov. 1, 1988	104,440 cwt.	3	9.0
Motor Trucks on Farm 3/	155,900 number	3	4.5
Commercial Grain Storage Capacity, Dec. 1, 1988	943,820,000 bu.	3	9.8
Land in Farms	47,900,000 acres	3	4.8
Cattle and Calves on Grain Feed, Jan. 1, 1989	1,460,000 head	3	13.1
Combines on Farms 3/	45,560 number	4	7.3
All Other Hay (All Excluding Alfalfa)	2,700,000 tons	4	4.7
Exports of Farm Products, FY 1988	2,329,800,000 dol.	4	6.6
Beef Cows, Jan. 1, 1989	1,450,000 head	6	4.3
Sheep and Lambs on Feed, Jan. 1, 1989	98,000 head	6	6.1
All Hay Produced	5,175,000 tons	6	4.1
Cash Receipts from Farm Marketings, 1987	5,721,509,000 dol.	7	4.1
Corn Grain Produced	143,750,000 bu.	8	2.9
Alfalfa Hay Produced	2,475,000 tons	10	3.6
Hogs on Farms, Dec. 1, 1988	1,500,000 head	10	2.7
Soybeans Produced	46,000,000 bu.	11	3.0
Field Forage Harvesters on Farms 3/	8,305 number	11	3.1

KANSAS FARM FACTS

BLUESTEM PASTURE

The Bluestem Pasture Report covers the 14 county Flint Hills region (as shown in the map below), which totals approximately 3.4 million acres of pasture and rangelands in Kansas. The average reported date for the start of the 1989 grazing season in the Flint Hills was April 21 and the average reported ending date for the grazing season is October 12. The reported dates for burning pastures ranged between April 9 and April 20. Only 22 percent reported burning pastures, with greater frequency reported in Chase, Lyon and Coffey counties. Average lease prices for 1977-1987 are included in the table below.

The intensive grazing concept consists of doubling the normal stocking rate on native range and grazing only during the first half of the season, typically May 1 to July 15. Intensive grazing is frequently being used throughout the Flint Hills region. The average rates for intensive grazing in 1989 were $36.40 per head for steers and heifers under 700 pounds, with an average of 2.5 acres available per animal. Steers and heifers over 700 pounds averaged $43.50 per head with 2.8 acres available per animal. Cows with fall calves averaged $72.00 per pair with an average of 4.7 acres available per pair. Spring calving pairs averaged $62.00, with 4.5 acres guaranteed per pair.

Debt/assets: Non-real estate	46.7	46.7	44.7	40.1	36.0

NOTE: CCC loans are no longer included under farm debt; therefore, total farm debt and ratios to debt are not comparable to those published prior to 1987. Source: Economics Research Service, USDA.

1/ Data are for farms with sales of $1,000 or more annually.
2/ Preliminary.
3/ Excludes value of operator dwellings.
4/ Excludes horses, mules, and broilers.
5/ Includes only farm share value for trucks and autos.
6/ All non-CCC crops held on farms plus the value above loan rate for crops held under CCC.
7/ Excludes debt on operator dwellings, but includes CCC storage and drying facility loans.
8/ Excludes debt for non-farm purposes.

1946	143	-	-	1988	69	694	47,900

1/ Beginning with 1975, a farm is defined as any place with annual sales of agricultural products of $1,000 or more. Between 1959 and 1975 a farm was defined as a place of 10 or more acres that had annual sales of agricultural products of $50 or more or a place of less than 10 acres that had annual sales of $250 or more. Prior to 1959 a farm was defined as a place three acres or more in size with a value of farm products amounting to $150 or more. Places of less than three acres with sales of $250 or more were also considered farms.

2/ Land in farms estimates not available on annual basis until 1950.

1/ Beginning in 1985, acres harvested for all purposes no longer includes acres harvested as forage.
2/ Beginning in 1986, price per bushel is marketing year average price which does not include an allowance for loans outstanding and government purchases.
3/ Record high.
4/ Record low.

KANSAS FARM FACTS

FARM FACTS INDEX

TABLE of CONTENTS..... i

1988 AGRICULTURAL HIGHLIGHTS.....ii-iii

GENERAL STATISTICS..... 2- 9

Agribusiness..... 5
Agricultural export shares..... 4
Crop reporting districts..... 2
Crops: acreage harvested and value, by counties..... 6-7
Farms: number, size, acres..... 2
number, by counties..... 6-7
Feed: commercial, sales of..... 5
mill feed produced..... 5
Fertilizer: sales..... 5
Flour production and value..... 5
Rank of Kansas' agriculture..... 3
Precipitation: by districts, by months..... 8
by counties..... 9
Soybean oil and meal production and value..... 5
Temperature: average by districts, by months..... 8
Value of livestock produced, by counties..... 6-7
Weather data..... 8-9
Weights and Measures..... 110

CROP STATISTICS..... 10-69

Apples (commercial): production and value, by districts..... 69
Barley: acreage, production and value, by districts..... 68
Corn: all, acres planted and harvested, by counties..... 36-39
grain, acreage, yield, production and value, by counties..... 36-39
irrigated and dryland grain production, by counties..... 40-43
silage; acreage, yield, production and value, by counties..... 44-47
Dry Beans: acreage, production and value, by counties..... 69
Hay: Alfalfa; acreage, production and value, by counties..... 56-59
Other Hay; acreage, production and value, by counties..... 60-63
All Hay; acreage, production and value, by counties..... 64-67
Oats: acreage, production and value, by districts..... 68
Pasture: acres, by counties, 1982 census..... 66-67
Peaches: production and value, by districts..... 69
Rye: acreage, production and value, by districts..... 68
Sorghum: all; acres planted and harvested, by counties..... 24-27
grain; acreage, production and value, by counties..... 24-27
irrigated and dryland grain production, by counties..... 28-31
silage; acreage, production and value, by counties..... 32-35
Soybeans: acreage, production and value, by counties..... 48-51
irrigated and dryland production, by counties..... 52-55
State Summary: Crops - Acreage, yield, production, and value..... 11
Sunflowers: Acreage, yield, production..... 11
Wheat: acreage, production and value, by counties..... 12-15
continuous cropland..... 18-19, 22-23
irrigated and summer fallow.....16-17, 20-21

LIVESTOCK STATISTICS..... 70-93

Catfish: number of operations, water surface, production and total sales..... 81
Cattle: calves born, by county..... 76-77
all cattle and calves, by counties..... 76-79
beef cows, number, by counties..... 76-79
commercial slaughter, by months..... 72
marketings, other..... 73
milk cows, number, by counties..... 76-79
milk cows and production, by months..... 88
milk cows, production and value, by counties..... 90-91
number and value, by counties..... 76-79
number, by classes..... 71
number of cattle operations..... 71
production, disposition and income..... 73
value of production, by counties..... 86-87
Cattle on feed: classification and weight groups, by quarter..... 74
marketings and placements, by months..... 74
marketings, grain fed..... 73
marketings, by size group..... 73
number, by counties..... 76-79
number of feedlots, by size groups..... 73
Chickens: layers on hand, by months..... 89
number and value, by counties..... 92-93
number on farms..... 89
production and value..... 89
Dairy: milk production and value..... 88
manufactured products..... 88
Eggs: production, by months..... 89
production, disposition, income..... 89
Hatchery production..... 88
Hogs: commercial slaughter, by months..... 72
number and value, by counties..... 82-85
number, by classes..... 71
number of hog operations..... 71
pig crop, by counties..... 82-85
production, disposition, income..... 75
value of production, by counties..... 86-87
Pasture: Bluestem map, value & rental rates, rental acreage guarantees 80-81
Sheep: commercial slaughter, by months..... 72
number and value, by counties..... 82-85
number, by classes..... 71
number of sheep operations..... 71
production, disposition and income..... 75
value of production, by counties..... 86-87
Red meat production and value..... 72
Turkeys: production and value..... 89
Wool: production and value..... 75

ECONOMIC STATISTICS..... 94-97

Farm assets and debts..... 97
Farm income..... 95
Farm values and rents..... 97
Income from farming, cash receipts, gross and net farm income..... 95
Production expenses..... 96

HISTORICAL STATISTICS..... 98-107

Historical tables..... 99-107
corn, all purposes, 1866-1918..... 106
corn, all purposes and grain, 1919-1988..... 107
livestock, 1867-1989..... 100-101
number of farms and land in farms, 1860-1988..... 99
sorghum, all purposes, grain, 1929-1988..... 104
soybeans, 1924-1988..... 105
wheat, 1866-1988..... 102-103

Weights and Measures

Bushel weights:
